Chicago, Illinois 60604

EPA 905-R-05-001

January 2007

Sampling and Analytical Procedures for GLNPO's Open Lake Water Quality Survey of the Great Lakes

Approvals¹

Marvin Palmer
Board Chemistry Technical Lead

Date

Dr. Paul Bertram
Dissolved Oxygen Technical Lead

Date

David Rockwell and Glenn Warren
Biology Technical Leads

Date

Dr. Glenn Warren
Limnology Technical Lead and Project Officer

Date

George Ison
Ship Operations Contract Project Officer, Ship Safety Officer

Date

Dr. Glenn Warren
Environmental Monitoring and Indicators Team Lead

Date

Paul Horvatin
Monitoring Indicators and Reporting Branch Chief

Date

Louis Blume
GLNPO QA Manager

Date

Dr. Kenneth Klewin
Great Lakes Environmental Database (GLENDAs) Manager

Date

Charles (Marc) Colvin
Safety and Occupational Health Manager

Date

¹ Approval of this manual constitutes approval of the Quality Assurance Project Plan for the Great Lakes Water Quality Surveys (Appendix B of this manual).

Acknowledgments

This manual was prepared under the direction of Paul Horvatin, Glenn Warren, and the work assignment manager Louis Blume of the EPA Great Lakes National Program Office (GLNPO). It was prepared under EPA contract no. 68-C-01-091 by DynCorp Science and Engineering Group. Special thanks are extended to Marvin Palmer, David Rockwell, Paul Bertram, and Marc Tuchman of GLNPO for their technical review of key sections; Bob Christensen of Cetacean Marine, Inc for assisting with geographical data and station locations, Judy Schofield and Molly Middlebrook of DynCorp for compiling, editing, and designing components of the document; Mary Beth Giancarlo, Dan Beaurain and Jackie Adams of Oak Ridge Institute for Science and Education for their key contributions; the GLAS contractor chemist (Mike Yusim), the biology grantee (Mary Balcer), and AMS for their assistance.

Disclaimer

This document describes sampling and analytical methods and standard operating procedures used by staff aboard EPA's *R/V Lake Guardian*. Users of this document should recognize that the methods and procedures provided in this manual are subject to change.

Users of this document also should recognize that these methods do not constitute "approved EPA methods" for use in compliance monitoring programs. Publication of this manual is intended to assist staff aboard the *R/V Lake Guardian* and to provide a reference tool for researchers interested in building upon *R/V Lake Guardian* findings. Mention of company names, trade names, or commercial products does not constitute endorsement or recommendation for use.

Table of Contents

Chapter 1: Water Quality Survey Overview

Introduction

Scientific Check List

LG100 Standard Operating Procedure for General Shipboard Scientific Operations, Revision 02

LG101 Standard Operating Procedure for Electronic Field Information Recording, Revision 02

Chapter 2: Nutrient Parameters

Introduction

LG200 Field Sampling Using the Rosette Sampler, Revision 05

LG201 Standard Operating Procedure for Niskin Bottle Hydrographic Line Sampling, Revision 01

LG203 Standard Operating Procedure for Nitrate-Nitrite in Lake Water (QuikChem FIA+8000 Method), Revision 06

LG204 Standard Operating Procedure for Total and Total Dissolved Phosphorous (Lachat Method 10-115-01-1-F for QuikChem FIA+8000), Revision 07

LG205 Standard Operating Procedure for Chloride and Silica in Lake Water (Lachat Method), Revision 07

LG206 Standard Operating Procedure for Sampling of Particulate-Phase Organic Carbon, Nitrogen and Phosphorous in Great Lakes Waters, Revision 03

LG207 Standard Operating Procedure for the Analysis of Particulate-Phase Organic Carbon, Revision 03

LG208 Standard Operating Procedure for Particulate-Phase Total Nitrogen by Alkaline Persulfate Oxidation Digestion (Lachat Method), Revision 03

LG209 Standard Operating Procedure for Particulate-Phase Total Phosphorous by Persulfate Oxidation Digestion (Lachat Method), Revision 06

LG210 Standard Operating Procedure for the Sampling of Particulate-Phase and Dissolved-Phase Organic Carbon in Great Lakes Waters, Revision 01

LG211 Standard Operating Procedure for Dissolved Organic Carbon, Revision 03

LG212 Standard Operating Procedure for Nutrient Samples Processing, Revision 03

LG213 Standard Operating Procedure for the Analysis of Metals in Waters and Wastewaters by ICP Method 200.7 Using the Perkin Elmer Optima 3300 DV and 4300 DV, Original

Chapter 3: Physical Parameters

Introduction

LG300 Standard Operating Procedure for Meteorological Data Aboard the *R/V Lake Guardian*, Revision 02

LG301 Operating the Seabird CTD, Original

LG302 Standard Operating Procedure for the Sampling and Analysis of Total Suspended Solids in Lake Water, Revision 04

LG303 Standard Operating Procedure for the Determination of Dissolved O₂ Correction Factors, Revision 01

LG304 Standard Operating Procedure for Determination of Dissolved Oxygen in Lake Erie (See Appendix D)

Chapter 4: Biological Parameters

Introduction

LG400 Standard Operating Procedure for Phytoplankton Sample Collection and Preservation Field Procedures, Revision 09

LG401 Standard Operating Procedure for Phytoplankton Analysis, Revision 03

LG402 Standard Operating Procedure for Zooplankton Sample Collection and Preservation and Secchi Depth Measurement Field Procedures, Revision 10

LG403 Standard Operating Procedure for Zooplankton Analysis, Revision 03

LG404 Standard Operating Procedure for Chlorophyll *a* Sampling Method Field Procedure, Revision 06

LG405 Standard Operating Procedure for In Vitro Determination of Chlorophyll *a* in Freshwater Phytoplankton by Fluorescence, Revision 07

LG406 Standard Operating Procedure for Benthic Invertebrate Field Sampling Procedure, Revision 07

LG407 Benthic Invertebrate Laboratory Procedure, Revision 06

Chapter 5: Board Chemistry Parameters

Introduction

LG500	Standard Operating Procedure for GLNPO Board Analyses, Revision 05
LG501	Standard Operating Procedure for Dissolved Oxygen Micro Method, Winkler Titration, Revision 04

Chapter 6: Nutrients in Sediments

Introduction

LG600	Standard Operating Procedure for Total Phosphorous in Sediments by Persulfate Oxidation Digestion (Lachat Method), Revision 03
LG601	Standard Operating Procedure for Analysis of Total Organic Carbon in Sediments (Dry Combustion, IR Detection), Revision 04
LG602	Standard Operating Procedure for Total Nitrogen in Sediments by Alkaline Persulfate Oxidation Digestion (Lachat Method), Revision 04

Appendices:

Appendix A	Great Lakes Maps of Survey Stations
Appendix B	Quality Assurance Project Plan (QAPP) for the Great Lakes Water Quality Surveys
Appendix C	Great Lakes Water Quality /Limnology Survey Staffing Schedule
Appendix D	Dissolved Oxygen and Temperature Profiles for the Central Basin of Lake Erie Quality Assurance Project Plan (QAPP)
Appendix E	Survey Plan Submittal Forms
Appendix F	Self-certification Form
Appendix G	Medical History Questionnaire
Appendix H	Hard-copy Field Information Recording Forms
Appendix I	Lists of Acceptable GLENDAs Codes
Appendix J	User's Manual for the Remote Data Entry Tool
Appendix K	GLENDAs Analyte Names and Codes
Appendix L	Chief Scientist Roles and Responsibilities, and List of Priorities for Each Staffing Period and Chief Scientist and Shift Supervisor List of Responsibilities and Checklist for Each Shift
Appendix M	Issues and Revisions Sheet
Appendix N	Data Status Tracking Sheet
Appendix O	Data Discrepancy Form
Appendix P	Summary of Sample Depths Collected as part of the WQS for all Five Lakes
Appendix Q	Station Location Change Form
